

The Seasons

Winter is the first season of the year,
it's cold and frosty and snow is here.

In Spring the first flowers start to grow,
the sun shines warmer and melts the snow.

In Summer the children are happy and have fun,
they can swim - it's nice and hot in the sun.

Autumn brings wind and lots of rain,
the leaves change colours - it's getting cold again.

What are they called - the seasons of the year?
I think you know it - there are clever children in here!

Winter, Spring, Summer and Autumn!
